

ACCESSORIES

BOMB BLAST BIN

A mobile blast container that is constructed from a composite woven material to withstand blast and fragments from IED devices containing up to 16oz (500g) of PE4.

Description

The unit has a removable inner bag designed to hold a suspect device in the upright position to allow X-Ray inspection whilst in the container. The bag is fitted with handle loops to allow easy removal of the package for safe transportation.

Datum points are marked on the outside of the container to allow X-Ray to be taken at specific points.

The outside of the main unit is fitted with rubber tyre rings to allow the tube to be rolled away from a sensitive area without removal of the package.

A detachable Base Plate is fitted to the unit to provide protection to the floor when in the upright position.

Features

- Suitable for post bombs
- Can be -Xrayed
- Detachable base plate
- Composite construction
- Removable retaining bag
- Easily carried or rolled

Specifications

- Height: 900 mm
- Internal diameter: 500 mm
- Outside Diameter: 536mm
- Wall thickness 18mm
- Weight: 50 kg
- Colour: Dayglow orange for high visibility
